

Live Streaming Mobile Kit

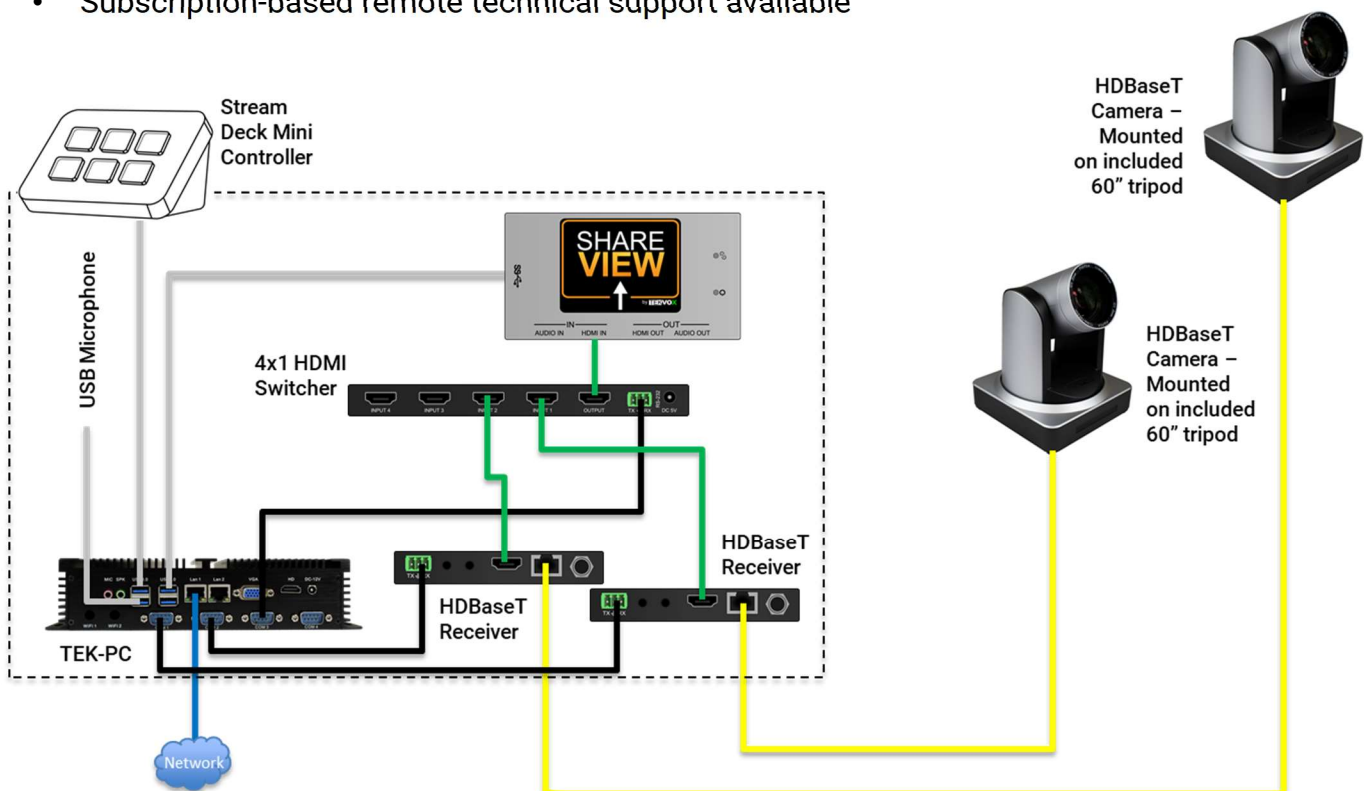

71208-DI Data Sheet

The TEKVOX 71208-DI Drop-In provides a mobile, quick-setup solution for equipping any room with live-streaming capabilities. Featuring dual sleek PTZ cameras with preset positions & 5x or 20x optical zoom, this A/V solution offers professional-quality live streaming at an affordable price. With all equipment pre-programmed & mounted, and minimal cabling, adding live broadcasting to an existing facility without requiring a permanent installation or specialized programming has never been easier.

The system's PTZ cameras are connected via HDBaseT, allowing video, control signals, and power for each camera to travel through a single cable for a clean, no-mess setup. Each camera comes with a tripod for quick, stable mounting with no additional hardware. Users can select which camera to view, or show both at once in a side-by-side multiview display. Camera content is encoded for the provided PC via TEKVOX's ShareView™ technology. A studio-quality microphone captures voice audio, which is also passed to the computer. A StreamDeck Mini controller ties the system together with straightforward control of live-streaming and camera position. This Drop-In is compatible with any web-based videoconferencing software, including Zoom, Facebook Live, Teams, Skype, BlueJeans, and WebEx, as well as Youtube.

Features:

- Professional-quality live-streaming in a mobile, self-contained package for any space
- Dual PTZ cameras with preset positions, single-cable install, and 5x or 20x optical zoom
- StreamDeck Mini provides convenient, intuitive control of camera & live-streaming
- Professional-quality audio, video, and integration, all pre-programmed & tested
- Real-time, high-quality footage from camera with TEKVOX's ShareView technology
- Subscription-based remote technical support available
