

# Foundation VTC Drop-In

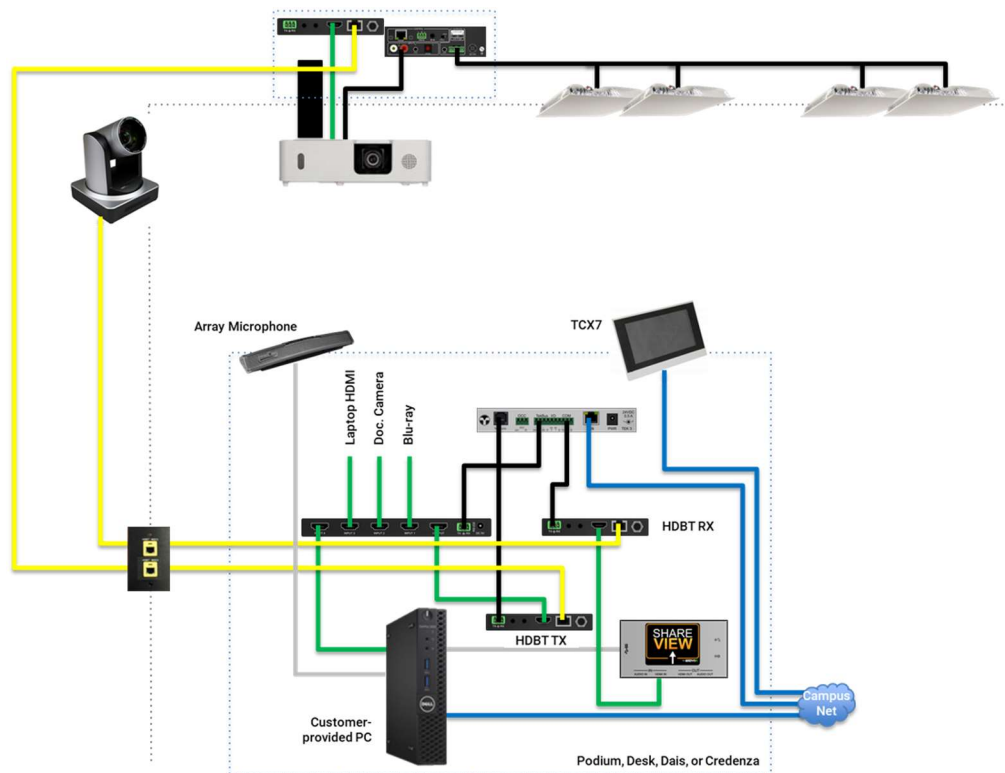

## 71406-DLC Data Sheet

The 71406-DLC offers foundational video conferencing and live streaming for a small or medium classroom. This solution expands on the capabilities of the 71404-DLC by adding audio amplification for superior video conference sound quality in larger rooms.

The Foundation VTC Drop-In is the ideal solution for adding local presentation, live-streaming/video conferencing, and TEKVOX's suite of remote management tools to a medium, entry-level classroom or training room. With TEKVOX's revolutionary ShareView™ technology, presenters can broadcast classroom video and lesson content simultaneously from a single interface. HDBaseT transmission carries audio, video, and control signals over a single cable for a professional, streamlined installation that just works, every time. A TCX7 7" touchscreen provides powerful, easy-to-use controls at your fingertips, with a customer-specific interface tailored to each individual system. An array microphone, Class-D audio amplifier, and cutting-edge PTZ camera provide exceptional-quality audio and video, ensuring crisp sound, dazzling video, and unmatched reliability.

### Features:

- Incredibly smooth, high-quality video from full-HD PTZ camera with 12x optical zoom
- ShareView™ allows simultaneous presentation of instructor video & lesson content
- Supports local presentation of PC & three other HDMI sources, as well as streaming of PC
- TCX7 Touchscreen Controller offers personalized, practical room control at your fingertips
- Array microphone supplies crystal-clear audio with built-in AEC for echo-free conferencing
- Available with 8Ω or 70V audio amplifiers for driving room speakers
- Compatible with any videoconferencing software (Skype, Zoom, BlueJeans, Teams, etc...)
