

Small VTC Conference Room

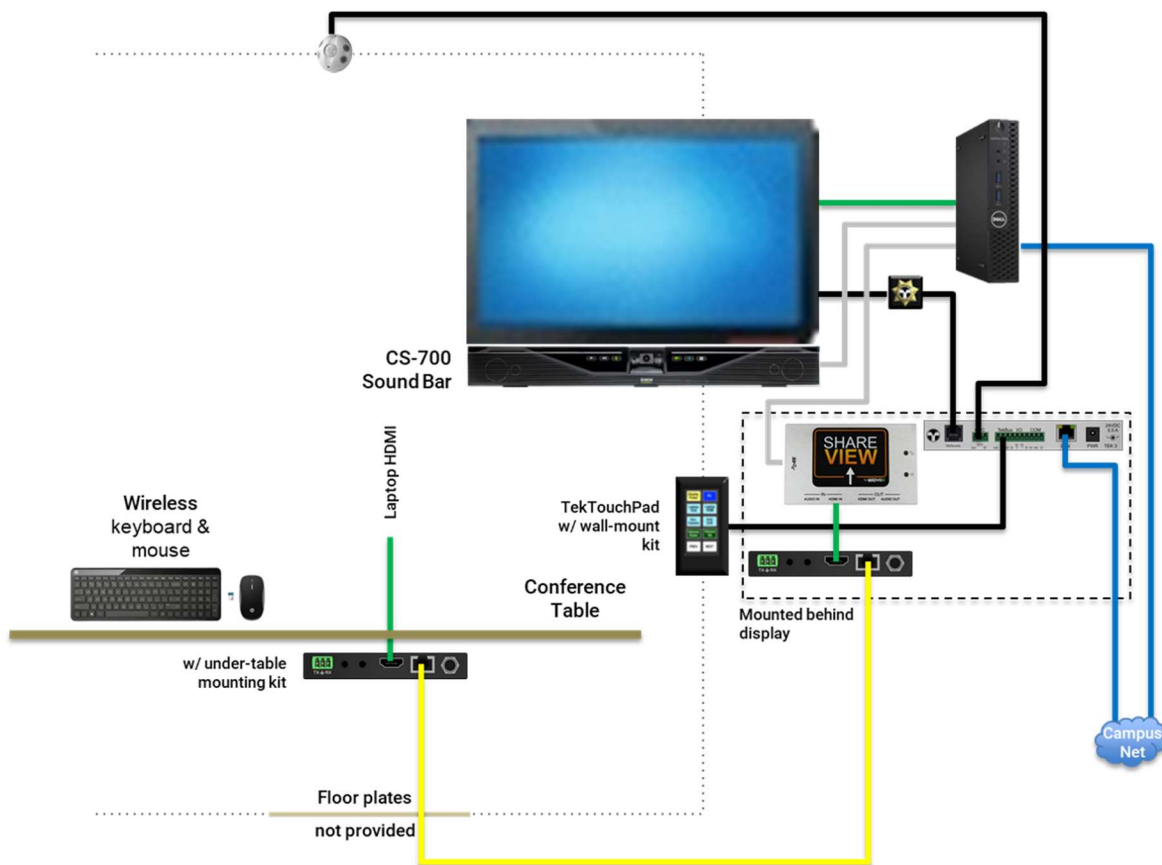

71021-T0-SV Data Sheet

The 71021-T0-SV provides versatile, easy-to-use meeting and videoconferencing capabilities to any small conference room. This Drop-In is compatible with any commercially available videoconferencing software, and allows users to share content to a video call directly from their laptop, without needing to open another instance of the meeting.

This Drop-In includes everything necessary to equip a conference room with modern, powerful videoconferencing capabilities and powerful remote management features. With TEKVOX's ShareView™ technology, meeting attendees can share content from their laptop by simply plugging into the convenient in-table connection; this system provides a streamlined, no-mess user experience with the functionality of a professional video conferencing software package. A wall-mounted touchpad provides intuitive, comprehensive control of the room, and features like occupancy-based automation, anti-theft protection, and remote management make this conference room solution truly exceptional and refreshingly cost-effective.

Features:

- Unified control of audio volume, display power, and source selection
- Hassle-free sharing of local video from a laptop or tablet via ShareView™
- Scheduled & motion-triggered automation for superior energy management & convenience
- Includes all cabling, software, and hardware needed for a complete system
- Compatible with any videoconferencing software (Skype, Zoom, BlueJeans, Teams, etc...)
