

# Tier 1 Conference Room

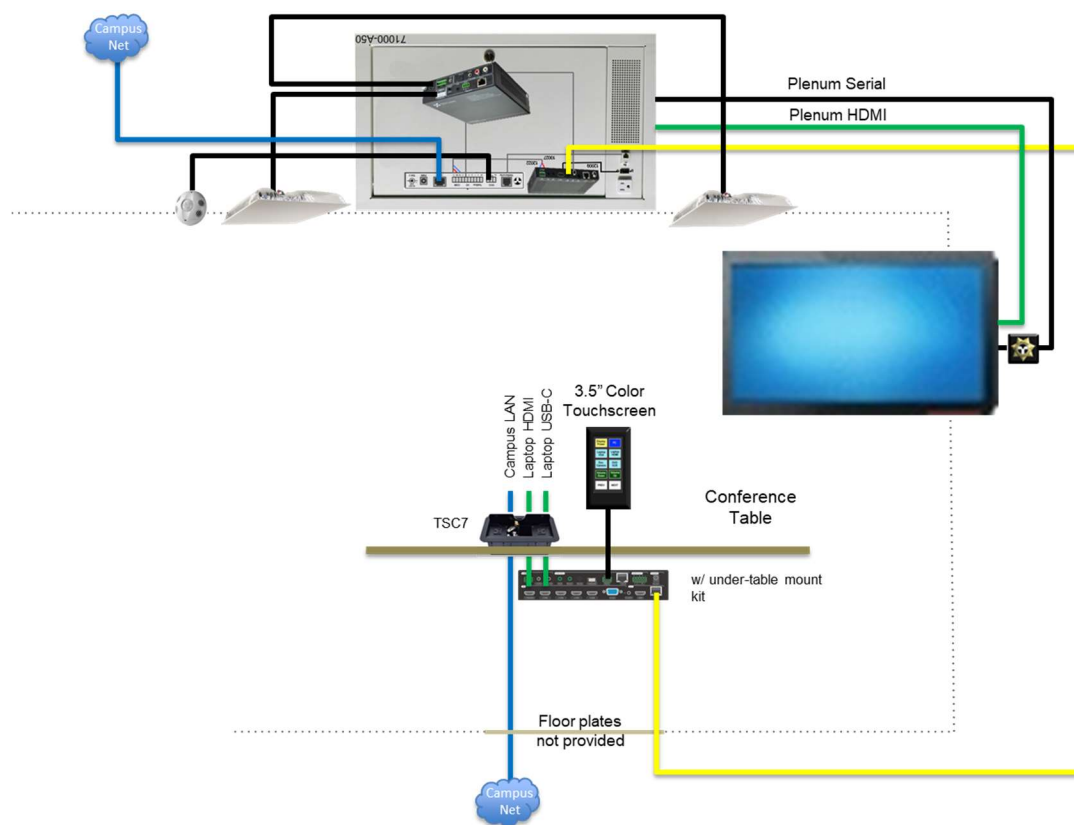

## 71021-T1 Data Sheet

The 71021-T1 Drop-In provides a quality, streamlined control solution for a modern, sophisticated conference room installation. With an elegant design, TEKVOX's Tier 1 Conference Room solution delivers advanced automation & scheduling functionality and convenient, intuitive control for any small conference room.

This system is built around a 1201-N+ presentation switcher—housed underneath the conference table—and a ceiling-mounted control enclosure. The 1201-N+ supports 6 HDMI, USB-C, or VGA connections & HDBase-T technology transmits video, audio, power, and RS232 control to the control enclosure. From there, the TEK3 TekMonitor collects sensor data and controls the display, audio amplifier, and video switching of the 1201-N+. A TekTouchPad mounted on the conference table provides an intuitive, customized user interface for controlling the entire room from a single convenient location.

### Features:

- Supports 6 HDMI, USB-C, or VGA connections
- Single-cable installation from conference table to ceiling enclosure w/ HDBaseT
- Asset protection, occupancy-based automation, and (optional) electric screen lift control
- Each bullet should be a single line (no wrapping)
- Include all variations of family (class/conference/RC/collab)
- Shipped fully functional, pre-programmed, and rigorously tested

# Tier 1 Conference Room

## 71021-T1 Technical Specifications
