# Medium Video Conference Room
71021-T1-SV Data Sheet

The 71021-T1-SV offers everything necessary to equip a medium conference room with modern, easy-to-use videoconferencing and meeting capabilities. This system allows users to share content to a video call directly from their laptop or tablet, without needing to open another instance of the meeting.

The Tier-1 ShareView Conference Room builds on the 71021-T0-SV by adding support for more in-table sources, allowing several users to have their devices plugged in simultaneously; it also adds a sleek in-table cable housing to keep user cables out of the way, but still easily accessible. With TEKVOX's ShareView™ technology, meeting attendees can share content from their personal devices by simply plugging into the convenient in-table connections; this system provides a streamlined, no-mess user experience with the functionality of a professional video conferencing software package. A wall-mounted TekTouchPad provides intuitive, comprehensive control of the room, and features like occupancy-based automation, anti-theft protection, and remote management make this conference room solution an industry standout in versatility, power, and ease of use.

Features:
- Unified control of audio volume, display power, and source selection
- Hassle-free sharing of local video from laptops or tablets via ShareView™
- Scheduled & motion-triggered automation for superior energy management & convenience
- Includes all software and hardware needed for a complete, working system
- Shipped fully-functional, pre-programmed, and rigorously tested
- Compatible with any videoconferencing software (Skype, Zoom, BlueJeans, Teams, etc…)
