

4K Collaboration Pod

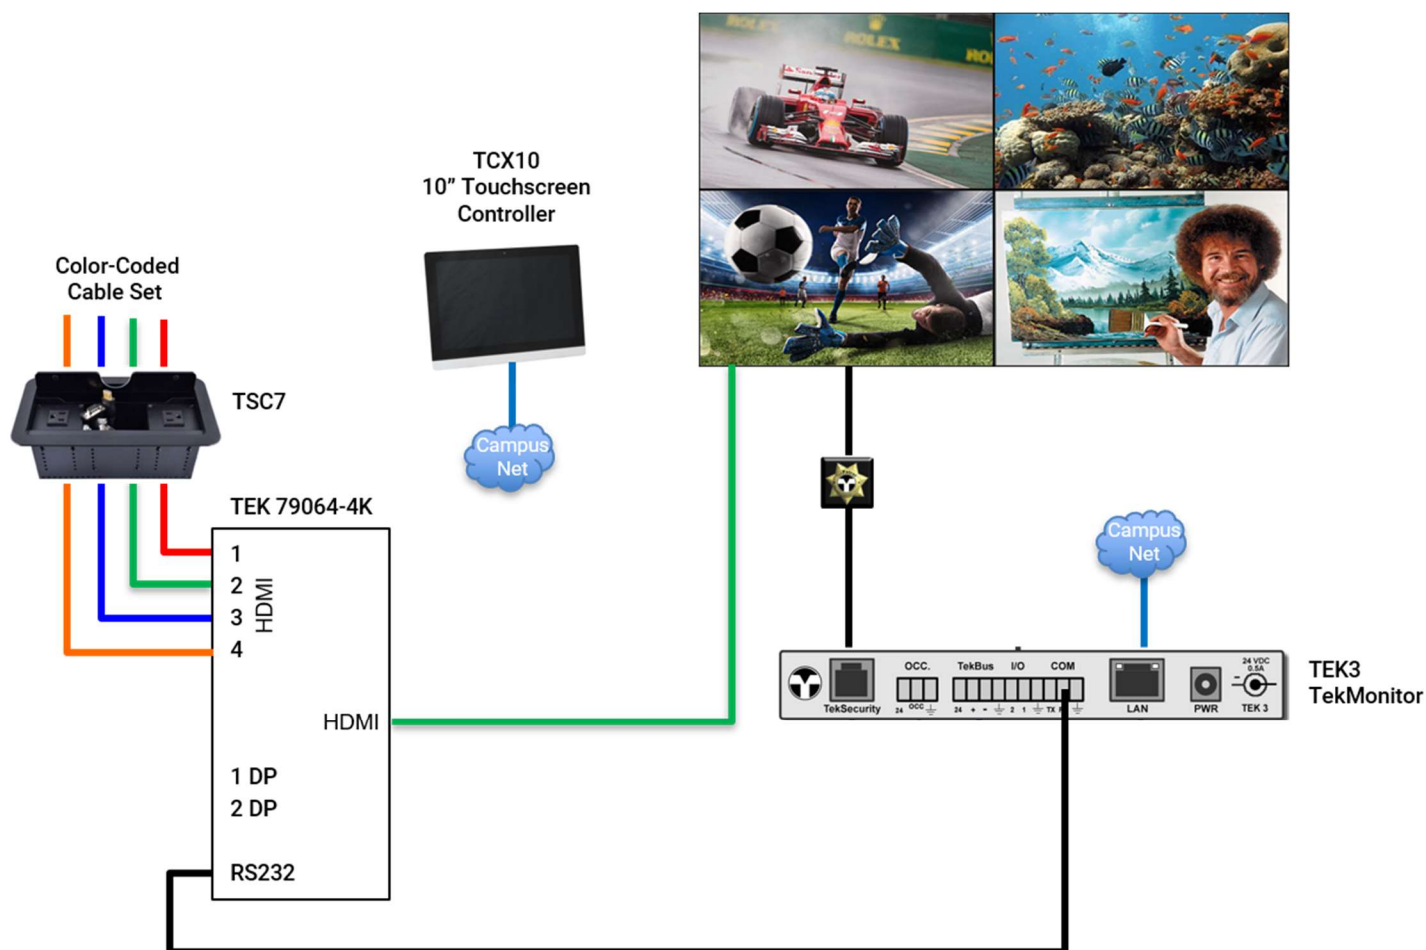

71028-DI Data Sheet

TEKVOX's 4K Collaboration Station Drop-In represents the apex of advanced A/V teamwork solutions, featuring breathtaking 4K resolution, flexible multiview of up to four sources, and practical, intuitive control via a high-quality touchscreen. The 71028-DI brings your group work to the next level with unrivaled flexibility & ease of use, all backed by TEKVOX's powerful remote management and automation capabilities.

Connect up to four sources at once via our premium, color-coded HDMI cables, conveniently stored in the provided in-table cable housing. The MV71-4K switcher performs lightning-fast, seamless switching, and allows users to display two, three, or four sources on the screen simultaneously, each in crisp 1080p resolution. A TCX10 touchscreen controller provides accessible, comprehensive control of the system, and can be mounted on the table or a nearby wall for even greater customizability.

Features:

- Display up to four users' content at once with flexible viewing modes
- Support for 4K resolution allows display of four sources, each at 1080p resolution
- Control system & seamlessly switch sources with TCX10 Premium Touchscreen controller
- Enjoy peace of mind with TekSecurity real-time anti-theft protection
