ShareView Switching
710BP-DLC_USR Data Sheet

The 710BP-DLC_USR Drop-In Booster Pack includes the infrastructure for equipping any system with ShareView local content sharing, as well as a TEK3 TekMonitor for remote management & control. All components come pre-installed on a 1 RU metal equipment tray, pre-wired and ready to use.

The 4x1 HDMI switcher allows users to select which of four different sources to view, and includes option for viewing multiple sources at once. The ShareView Adapter converts the user sources' video to a USB 3.0 stream for sharing via PC in a video conference. Finally, the TEK3 TekMonitor provides control of the switcher, remote management capabilities, and, when coupled with the 710BP-DLC_CAM Booster Pack, control of two PTZ cameras and the switcher used to select one or the other. Together with the 710BP-DLC_USR, this booster pack provides everything users need to add local content sharing and control to a new or existing video conferencing-capable system.

Features:
- Enables routing of user sources to a PC for sharing in a video conference
- Switch among sources easily and seamlessly, or display up to four at once with multiview
- All necessary cabling comes included and pre-wired
- Pair with 710BP-DLC_USR for full camera switching and control
- Comes installed on a 1 RU equipment tray for incredibly easy installation
- Shipped fully functional, pre-programmed, and rigorously tested
