

Live Streaming Mobile Kit

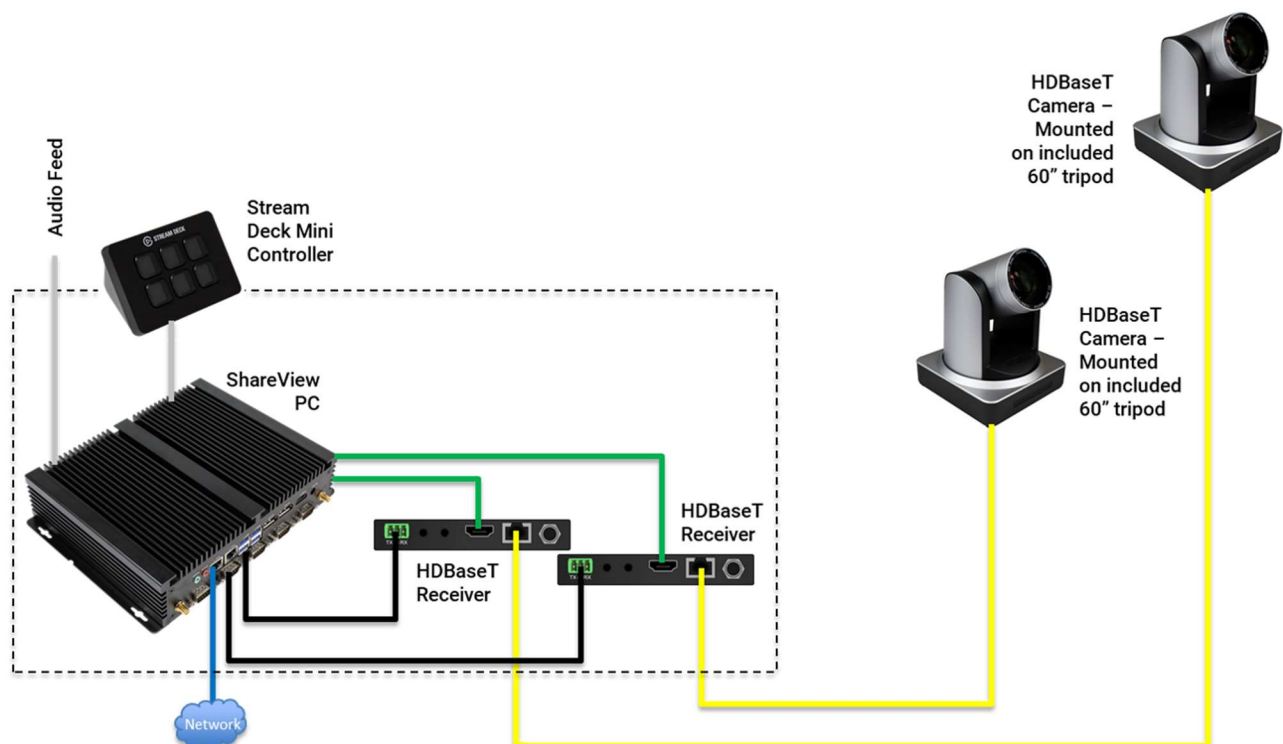

71208-DI Data Sheet

The TEKVOX 71208-DI Drop-In provides a mobile, quick-setup solution for equipping any room with live-streaming capabilities. Featuring dual sleek PTZ cameras with preset positions & 5x or 20x optical zoom, this A/V solution offers professional-quality live streaming at an affordable price. With all equipment pre-programmed & mounted, and minimal cabling, adding live broadcasting to an existing facility without requiring a permanent installation or specialized programming has never been easier.

The system's PTZ cameras are connected via HDBaseT, allowing video, control signals, and power for each camera to travel through a single cable for a clean, no-mess setup. Each camera comes with a tripod for quick, stable mounting with no additional hardware. Users can select which camera to view, without the need for additional equipment or software. Camera content is encoded for the provided PC via TEKVOX's ShareView™ technology. A studio-quality microphone captures voice audio, which is also passed to the computer. A StreamDeck Mini controller ties the system together with straightforward control of live-streaming and camera position. This Drop-In is compatible with any web-based videoconferencing software, including Zoom, Facebook Live, Teams, Skype, BlueJeans, and WebEx, as well as Youtube.

Features:

- Professional-quality live-streaming in a mobile, self-contained package for any space
- Dual PTZ cameras with preset positions, single-cable install, and 5x, 12x, or 20x optical zoom
- StreamDeck Mini provides convenient, intuitive control of camera & live-streaming
- Professional-quality audio, video, and integration, all pre-programmed & tested
- Real-time, high-quality footage from camera with TEKVOX's ShareView technology
- Subscription-based remote technical support available
