

# CB1-A Ceiling Box

## 78038 Data Sheet

TEKVOX's unique plenum rated TEK CB1-A ceiling box allows inclusion of non-plenum rated products and cables in the ceiling next to the video projector or display. The TEK CB1-A places the power outlet and HDMI connection on the bottom of the ceiling. The ceiling box not only supplies a secure location for HDBaseT products, system controllers, and amplifiers, but supplies power outlets as well. When ordered as part of a Drop-In A/V® solution, the CB1-A comes with a TekMonitor networked controller, HDBase-T receiver, and audio amplifier pre-installed and tested.

### Features:

- 2' x 1' Ceiling box for installation in standard 2' x 2' drop ceiling grids
- Plenum-rated (conforms to UL 2043 Fire and Safety test)
- Six internal power outlets
- Removable equipment tray for securely mounting non-Plenum-rated equipment
- Power outlet, HDMI connection, and serial port on underside for projector cabling
- Customized lid design available for additional cost
- All necessary mounting hardware included

# CB1-A Ceiling Box
