

# ShareView Wireless

## 79060-WPS Data Sheet

ShareView Wireless offers the advanced functionality of a 4K multiview switcher, combined with the convenience of a wireless presentation system. It allows multiple users to share content at once, and supports 4K resolution, all without requiring any wires or cabling. Users can plug in one of the HDMI or USB-C wireless transmitters to share their screen, without needing to download any software. ShareView Wireless also supports Apple AirPlay, and the Android WirelessMedia2 app, for sharing from tablets & smartphones.

Unlike other wireless presentation systems, ShareView Wireless is plug-and-play, able to switch quickly between sources. The wireless transmitters are powered via the connected device's USB port, and so do not require charging. With the base unit connected to a touchscreen, users can control connected laptops through that touchscreen, even in multiview.

### Features:

- Supports resolutions up to 4Kx2K @ 60Hz
- Displays up to four sources simultaneously
- Available with HDMI and USB-C wireless transmitters
- Controllable via built-in touch controls or Telnet/RS232
- Three levels of wireless network security
- Touchscreen control of connected laptops
- Operates without the need for a network connection

| Part No.    | Description    |
|-------------|----------------|
| 79060-WPS   | Base unit only |
| 79060-WPS2  | 2 Dongles      |
| 79060-WPS4  | 4 Dongles      |
| 79060-HDMI  | HDMI Dongle    |
| 79060-USB-C | USB-C Dongle   |

ShareView Wireless Base Unit

HDMI & USB-C Wireless Transmitters

AirPlay for Apple Devices

WirelessMedia2 app for Android devices
