 Contact for access / scheduling
- North Harris: Summary Status: 50 of 90 rooms assessed
- 24/50 rooms the TEK1s had no power, we attempted to test with temporary power
- 14 had no LAN connections to the TEK1 (dark wire or no wire), tested with long wire where possible
- 19 had incorrect passcodes (usually factory default) so are hard to find during search
- 7 were on the wrong VLAN segment
- 4 unresponsive TEK1s were found
 - many of these units had never been powered up at LSC with a live network
- Electrical shock hazard noted due to ungrounded 277v lighting wiring
